Central and Regional Governments Sign Commitment to Accelerate Education Unit Revitalization

JAKARTA, September 5, 2026— The Ministry of Primary and Secondary Education (MoPSE), together with regional governments, reaffirmed their commitment to the implementation of the Education Unit Revitalization and Learning Digitalization Programs. The commitment was marked by the signing of the 2026 Education Unit Revitalization Agreement and the 2025 Minutes of Handover (BAST) for Learning Digitalization between regional governments and MoPSE on Friday, September 4, in Jakarta.

The symbolic signing took place during the 2026 Central and Regional Coordination Meeting on the Education Unit Revitalization and Learning Digitalization Programs. The meeting was attended by representatives of provincial and regency/city education offices, MoPSE Technical Implementation Units (UPTs), and relevant ministries and agencies.

Minister of Primary and Secondary Education Abdul Mu'ti expressed his appreciation to regional governments for supporting the implementation of the Education Unit Revitalization Program in both 2025 and 2026. He emphasized that the cooperation needs to be maintained, as the revitalization program is implemented through self-management by educational units and therefore requires support and assistance from regional governments.

"We would like to express our gratitude to the regional governments for their cooperation, which has enabled the completion of the 2025 revitalization program and the ongoing 2026 program to be implemented as well as possible," Minister Mu'ti said.

In implementing the Education Unit Revitalization Program, regional governments are expected not only to provide coordination support but also to assist educational units in carrying out the program in accordance with applicable regulations. Minister Mu'ti emphasized that such assistance is also part of efforts to ensure the program is implemented accountably, both in financial management and physical implementation.

"We expect heads of education offices and regional heads to provide support and assistance and ensure that the revitalization program is implemented as well as possible. We must not allow certain individuals to cause the program to be implemented in violation of applicable regulations. We hope that you will ensure the revitalization program is implemented as well as possible in accordance with the provisions, both in terms of financial management and physical implementation," Minister Mu'ti said.

This commitment also provides a foundation for the continuation of the program in 2027. The government will continue to prioritize schools affected by disasters, schools located in 3T (frontier, outermost, and underdeveloped) regions, and schools with severe damage. In 2027, the revitalization program is targeted to expand to 100,000 educational units. With this target, the cumulative number of educational units that have received revitalization assistance is expected to approach 200,000 nationwide. The expansion of the program is expected to provide greater benefits in improving the quality of education across Indonesia.

"Our priorities for 2027 will remain the same. The schools we prioritize are schools affected by disasters, schools in 3T regions, and schools that are severely damaged," Minister Mu'ti explained.

Director General of Early Childhood, Primary, Secondary, Non-Formal, and Informal Education Gogot Suharwoto said that the Central and Regional Coordination Meeting serves as a bridge, carrying the success of the revitalization and digitalization programs from 2025 to 2026. In 2025, MoPSE completed the revitalization of 16,167

PRESS RELEASE

educational units with a budget of IDR 16.9 trillion, benefiting 4.23 million students. In the same year, the government also distributed 288,000 Interactive Flat Panels (IFPs) to schools across Indonesia, with each school receiving one unit.

"Today's coordination meeting is being held to serve as a bridge for the success of the 2025 revitalization and digitalization programs into 2026. This will allow us to continue the momentum to complete the President's priority programs in 2026. In accordance with Presidential Instruction No. 7 of 2025, the revitalization and accelerated digitalization programs are the President's priority programs that we must implement together with UPTs across Indonesia," Director General Gogot said.

The Central and Regional Coordination Meeting was held with three objectives: to improve the effectiveness, efficiency, transparency, and accountability of program implementation; to ensure the proper utilization of government assistance for revitalization and digitalization; and to strengthen central and regional synergy in facilitating, assisting, monitoring, and overseeing the programs.

Regional Support for Education Unit Revitalization and Learning Digitalization

Support for the implementation of the programs was also expressed by regional education officials. Deivy Regar, Head of the Keerom Regency Education Office, Papua, said that the Education Office fully supports the revitalization program and provides assistance throughout its implementation.

"We fully support this revitalization program. We provide assistance starting from the initial planning stage, collecting data on the condition of educational units, and coordinating with schools, as well as providing assistance throughout the implementation process," Regar said.

He expressed hope that the program would continue to address the various needs of educational units, particularly in supporting learning digitalization. He also emphasized the need for assistance and training for teachers to optimize the use of digital technology in learning, especially in educational units in 3T regions that continue to face various limitations.

Meanwhile, Mario, Acting Head of the Bangka Barat Regency Education Office, said that the signing of the Agreement is an important form of building a shared understanding between the central and regional governments. Symbolically, the signing represents an alignment between the two sides in supporting the implementation of the revitalization program, with educational units serving as implementers and education offices providing assistance.

A similar view was expressed by Muhammad Reza Prabowo, Head of the Central Kalimantan Provincial Education Office. The Central Kalimantan Provincial Government has prepared budgetary support to accompany the implementation of revitalization and digitalization. "The Central Kalimantan Provincial Government provides concrete support. We have prepared a specific budget allocation to support revitalization and digitalization activities," Prabowo said.

The signing of the commitment is part of efforts to ensure that the Education Unit Revitalization and Learning Digitalization Programs are implemented optimally, reach their intended targets, and continue sustainably. Collaboration between the central and regional governments is expected to ensure continued support for educational units in accordance with the respective roles of each party and contribute to improving the quality of learning across Indonesia.
