PRESS RELEASE

Number: 857/sipers/A6/X/2026

Minister of Primary and Secondary Education Accompanies Coordinating Minister for Human Development and Culture on Visit to Revitalized SDN Cirimekar 02

BOGOR REGENCY, West Java, October 7, 2026 — At SDN Cirimekar 02 in Bogor Regency, classrooms that once suffered from severe damage have been fully rehabilitated, and lessons are now supported by interactive flat panels. During a visit to the school on Wednesday (10/7), the Minister of Primary and Secondary Education, Abdul Mu'ti, accompanied the Coordinating Minister for Human Development and Culture, Sugiono, to inspect the government's priority programs in education.

The visit provided an opportunity to review the outcomes of the Educational Unit Revitalization (Revitalisasi Satuan Pendidikan) program and the implementation of the Learning Digitalization (Digitalisasi Pembelajaran) initiative. Both ministers inspected the school's conditions before and after revitalization, observed classroom learning processes, and joined students for a meal under the Nutritious Free Meal (Makan Bergizi Gratis/MBG) program.

The arrival of the two ministers was met with enthusiastic greetings from students, who eagerly welcomed them and showcased their newly comfortable learning environment. Minister Mu'ti reminded the students to make the most of their improved facilities by studying harder. "When the school is good, you must study diligently," he said.

Principal of SDN Cirimekar 02, Bagus Eko Kurniawan, noted that the school conditions prior to revitalization were concerning, with leaky roofs, heavily damaged ceilings, and broken floors. Through a revitalization allocation of IDR 951,543,177, the school received rehabilitation of three classrooms, a school health unit, new sanitation facilities, and an administrative office.

Bagus explained that these improvements not only transformed the physical condition of the school but also greatly enhanced teaching and learning activities, welcomed by teachers, students, and parents. "Revitalization has brought a significant impact on our school's facilities and infrastructure, ensuring that learning activities run smoothly," Bagus stated.

Students shared similar sentiments. When asked about the school's condition following the upgrades, they expressed their happiness at having more comfortable classrooms. For them, the visible improvements directly enhanced their daily school experience.

Muhammad Ghazy Alfarizki, a sixth-grade student, shared that the repaired classrooms provided a much more comfortable learning atmosphere than before. "It's much more comfortable now!" Ghazy said.

In addition to infrastructure revitalization, SDN Cirimekar 02 has also received learning digitalization support through Interactive Flat Panels (IFPs). Coordinating Minister Sugiono observed firsthand how the devices are utilized in the classroom. Students actively engaged with the lessons, following visual materials displayed on the screens and participating throughout the session.

Fifth-grade teacher Satya Dewanta explained that the IFPs have been integrated into daily lessons for about a year. Science and Social Studies (Ilmu Pengetahuan Alam dan Sosial/IPAS) subjects make frequent use of the technology to visualize concepts such as human anatomy, sound, light, and various other topics.

According to Satya, the use of IFPs makes learning feel closer to the everyday lives of students who are already accustomed to digital devices. "They are bolder in expressing their opinions, and their motivation to learn is further ignited with the presence of these IFPs," he remarked.

The visit to SDN Cirimekar 02 highlights how the revitalization and digital learning programs directly impact school environments, offering students and teachers comfortable learning spaces while leveraging technology to foster more interactive educational experiences.
